

DRIVER

Polaris LS
Stable Fairway Driver

- Long and straight every time
- Favorite disc for beginners

Distance 341'
Plastic (M)(Q)(S)

6 4 -1 1

EXP-X
Overstable Fairway Driver

- Overstable reliability
- Excellent for backhand and forehand

Distance 334'
Plastic (Q)

7 3 1 4

JLS
Stable Fairway Driver

- #1 Do-It-All driver
- Excellent for all skill levels

Distance 362'
Plastic (M)(Q)(S)

7 5 -1 1

Draco
Overstable Distance Driver

- Powerful overstable distance
- Excellent for backhand and forehand

Distance 359'
Plastic (Q)

9 3 0 4

Orion LF
Overstable Distance Driver

- Women's world distance record holder
- Accuracy at all distances

Distance 384'
Plastic (M)(Q)(S)

9 5 -1 2

Orion LS
Stable Distance Driver

- Unsurpassed combination of distance and accuracy
- Great for all skill levels

Distance 385'
Plastic (M)(Q)(S)

9 4 -1 1

Aquarius
Understable Distance Driver

- Floats in water
- High glide delivers longer distances
- Beginner friendly

Distance 390'
Plastic (M)

10 5 -4 2

Astra
Understable Distance Driver

- High speed and sustained drift
- Beginner friendly

Distance 416'
Plastic (M)(Q)

11 5 -1 2

Aries
Understable Distance Driver

- High glide delivers longer distances
- Beginner friendly

Distance 424'
Plastic (S)

11 6 -4 2

Scorpius
Overstable Distance Driver

- Power driver for distance, speed and headwind stability
- Best for Intermediate+ players

Distance 431'
Plastic (M)(Q)(ZG)(S)

12 5 -1 3

Quasar
Overstable Distance Driver

- Extreme speed and dependable fade
- Good for sidearm throws

Distance 443'
Plastic (DT)(M)(Q)(ZG)(S)

13 5 0 3

Falcon
Overstable Distance Driver

- High speed for outstanding distance
- Like a Scorpius but faster, with less high-speed stability and similar strong finish

Distance 450'
Plastic (M)(Q)(S)

13 5 -2 2

MID RANGE

Aurora/QMS
Stable Midrange

- Superior accuracy on every line you give it
- Great for all skill levels

Distance 285'
Plastic (M)(Q)(S) (DT)

4 5 0 0

Sentinel
Overstable Midrange

- Reliable fade and dependability, even into the wind

Distance 291'
Plastic (Q)(S)

5 4 0 4

Taurus
Overstable Midrange

- Beefy, beaded and torque-resistant
- Powerful midrange with sustained lines without turnover

Distance 276'
Plastic (Q)

4 4 0 4

PUTTER

Omega
Putt & Approach

- Best-seller and all-time classic
- Maximum touch and control for putt & approach shots

Distance 247'
Plastic (DT)(M)(SS)(ET)(Q)(S)

2 3 0 0

Omega Big Bead
Putt & Approach

- The beaded rim provides a bit more fade than the classic Omega

Distance 246'
Plastic (M)(SS)(ET)(Q)(S)

2 3 0 1

Omega Driver
Putt & Approach

- Driving putter with a flat top for faster speed, more distance and fade than the original Omega

Distance 260'
Plastic (DT)

3 2 0 2

Omega 4
Putt & Approach

- The rim is beadless, blunt and thicker in hand compared to the Omega.
- Great for stability and putts in the wind.

Distance 248'
Plastic (DT) (ET)

MILLENNIUM

(785) 366-6684 • GolfDisc.com *golf discs*

PLAY SMART. KEEP IT SIMPLE. THROW MILLENNIUM.

FLIGHT PATHS WILL VARY BASED ON SKILL, POWER, AND THROWING STYLE. DISC FLIGHT PATH REPRESENTED ASSUMES A FLAT, FULL-POWER, RIGHT-HAND-BACKHAND THROW.

PLASTICS key

Delta-T (DT) • This stiff, base-level plastic is great for players who like a firm feeling disc that can wear in over time.

Millennium (M) • Disc golf's original premium plastic. It combines precision grip with scuff resistance. Millennium plastic offers the durability required to withstand wear and tear out on the course for an affordable price. Available in limited models as Millennium Firm.

SuperSoft (SS) • Designed for touch. SuperSoft offers a soft, sticky and grippy feel that will not let go of the chains. Durability that will last.

ExtraTack (ET) • This rendition of the Millennium Standard plastic has an extra tacky feel that provides a confident grip in all weather conditions. ET plastic wears in slowly and is durable. What makes this plastic blend so special is that it feels like a well-seasoned disc right out of the box. With unbelievable grip and durability it's either the best of both worlds, or it's from a different one entirely.

Quantum (Q) • The Quantum line is Millennium's most durable plastic. This blend allows the disc to hold the flight characteristics for a full disc life. Quantum plastic offers a smooth and solid feel in the hand with a translucent appearance.

Quantum Zero-G (ZG) • Short for "Zero-Gravity," this name refers to the near weightlessness of this plastic. Starting with Quantum plastic, microbursts of air are injected during the molding process creating thousands of ultra-tiny bubbles within the plastic, which result in disc weights as low as 130 and up to 164 grams.

Sirius (S) • Sirius plastic is a premium blend for the ultimate combination of grip and durability. This plastic will last a long time and feels good in the hand.

FLIGHT # key

SPEED GLIDE TURN FADE

Speed • Refers to how fast a disc travels when compared to a different disc driven by the same amount of force. Discs are generally rated by speed, with putters at speed 1 and drivers ranging into the low double digits. Speed is not used to measure how far a disc travels.

Turn • When a disc travels in a direction that is with its rotation. EXAMPLE: When a disc rotating clockwise veers to the right during flight.

Glide • Glide describes the disc's ability to maintain loft during flight. Discs with more glide are best for new players, and for producing maximum distance (especially downwind). Beginners looking for more distance should choose discs with more glide.

Fade • The tendency of a disc to fall away from the direction of its rotation. EXAMPLE: When a disc rotating clockwise veers to the left during flight.
